ETHIOPIA'S FORGOTTEN CIVIL WAR

While the Russian invasion of Ukraine dominates Western headlines, a brutal war of attrition grips one of Africa's most populous and diverse nations. Amid a multi-polar conflict pitting the central government and its allies against a litany of ethnic militias and guerilla groups, civilians have borne the brunt of violence while suffering a near-total lack of aid. The result is horrifying: analysts at the University of Ghent say that in just two years, the war has claimed between 385,000 and 600,000 Ethiopian lives.
